# Emirates Global Aluminium renews Assima's system training platform for 7 years!

We are excited to announce that Emirates Global Aluminium (EGA) has renewed its subscription to [Assima's systems training platform](#) on a 7-year deal.

EGA has been using Assima to train over 7000 users on 30-plus new software rollouts ranging from internal systems to SAP ECC, SAP SuccessFactors, and [SAP S/4HANA](#). This was achieved through simulation-based training over the last 3 years.

*Using [Assima's platform](#) enabled us to make all our systems training digital even before the pandemic. When people went fully remote, we were already equipped to provide simulation process training in self-paced modules or online sessions , said Ahmed Almusawi, IT PMO and Learning Solutions Manager at EGA. "After working for over 10 years with Assima on different training products that transformed system training and documentation at EGA, we took this decision to renew Assima's cloud platform for the next 7 years."*

This long-term commitment from one of the largest companies in the UAE would've been impossible without Assima's steadfast commitment to customer support combined with the measurable outcomes including reduced costs, onboarding time, and content creation time generated by its patented technology.

*Working with EGA has been more of a partnership than a vendor-client relationship. Their valuable feedback and innovative approach have allowed us to grow together since 2010. We are looking forward to this continuous collaboration in the years to come.*

- Brendan Scullion, EMEA Manager at Assima
